# HOW TO CHOOSE THE BEST VETERINARY SOFTWARE

Here is a comprehensive list of factors a Practice Owner should look at before buying a Veterinary Software.

## HOW OLD IS THE SOFTWARE?

Only a software that has been around for a long time can have the depth of features that veterinarians need. These software companies have evolved over time by receiving inputs from various veterinarians around the world.

**New!**

## WHEN THE LATEST VERSION WAS RELEASED?

The Veterinary PMS vendors usually roll out the new version of their software every 10 years. It is always advisable to choose a software whose latest version has been released in last 1 year.

## IS IT CLOUD-BASED?

Cloud-based software is more Reliable, Pocket-friendly, Scalable & Flexible. Most of the Veterinary Clinics are now preferring to adopt cloud technology for their clinic.

## DOES IT INTEGRATE WITH THE LABS YOU USE?

Check for the list of Integration Partners of a Veterinary Software before selecting it for your clinic. If the lab you are using is in the list partners, then only you should go for it.

## WILL IT HELP YOU GROW YOUR PRACTICE?

Look for the Marketing Aspect (e.g. Emails, SMS, Postcards, Customer Loyalty Program) of a Veterinary Software before choosing it.
